

TEXAS STATE OPTICAL

Since 1936

We are open and seeing patients.

For the safety of our patients and our employees
we are practicing the following:

- ✓ Employees are wearing masks and gloves
- ✓ We ask patients to wear masks or face coverings they supply
- ✓ Patients are asked if they have had upper respiratory issues or fever within the last two weeks
- ✓ All pens/HIPPA forms wiped down immediately after use
- ✓ Patients instructed that all frames are cleaned after trying on
- ✓ Frames are wiped down after handling with 70% rubbing alcohol
- ✓ Exam rooms, contact lens area, tables and front door wiped down with 70% rubbing alcohol after each patient
- ✓ Patients may pick up their eyewear curbside if desired

**We know your vision is important and so is your safety.
We are committed to providing you the best of both.**
